NAME INDEX

Aalen, O.O., 325n, 337, 387
Abrahamson, M., 422
Aghajanian, A., 137
Agresti, A., 215
Aigner, D.J., 228
Alderson, A., 459n
Aldrich, H., 77n, 85
Alexander, K.L., 318
Allenby, G.M., 442
Allison, P.D., 253–66
Alpert, R., 48
Alwin, D.F., 259
Amburgey, T.L., 326n
Andersen, P.K., 340
Anderson, A., 78, 106
Arminger, G., 317n

Baird, D., 460
Barnett, V., 423, 424, 430, 433, 442
Barnwell, B.G., 285
Barron, D.N., 97n
Bartholomew, D.J., 381, 387
Basilevsky, A., 78, 106
Bass, F.M., 384
Battese, G.E., 273, 289
Bean, J.A., 272, 273
Beauchamp, T.L., 336–7
Beck, F., 470
Becker, G.S., 121
Begg, C., 441
Bennett, E.M., 48
Bentler, P.M., 275, 280, 281
Berger, J.O., 144, 189, 193
Bergstrom, A.R., 337
Berk, R.A., 421–58, 459–60, 471, 473, 481–5
Bernardo, J.M., 128, 434
Bickel, P.J., 265
Bielby, W.T., 107
Biemer, P.R., 78
Binder, D., 272
Bishop, Y.M.M., 118
Blau, P.M., 205, 207, 210, 212, 213, 214, 216
Bloch, E., 377n, 384n
Blossfeld, H.-P., 346, 357n
Bock, R.D., 171, 274
Bohrnstedt, G.W., 224, 225
Bollen, K.A., 137, 223–51, 224–6, 230n, 254n, 255, 259, 459–68, 481–3
Bollen, K.B., 422
Borgan, O., 317n, 340
Boscardin, W.J., 171, 171n
Boswell, T., 470
Botsko, C., 422
Bowden, R.J., 228, 235
Box, G.E.P., 434, 442, 443n
Boyles, B.A., 79
Bradburn, E.M., 378, 416n
Brewer, M., 423
Brier, S.S., 121n
Brock, D.B., 275
Broemeling, L.D., 434
Bronson, R., 2n
Brooks, C., 111n
Browne, M.W., 227, 247, 275, 278, 279, 280
Bryk, A.S., 274
Buck, R.C., 372
Burke, P.J., 205
Burns, L.R., 383
Burt, R.S., 83, 378, 386n
Busemeyer, J.R., 223, 224, 225, 228, 231
Bush, G., 15n, 242–5

Campbell, A., 452
Campbell, J.E., 171
Cantor, D., 79, 80

Carley, K., 2n, 13
Carlin, B.P., 171, 191
Carroll, N., 2n
Casady, R.J., 284, 286
Cassell, J., 85
Chamberlain, G., 279, 317n
Chan, J., 284
Charles, M., 198, 218
Cheng, M., 107
Child, J., 84
Chou, C.P., 281
Clay, Henry, 428
Clogg, C.C., 197n, 197–220, 198, 200–2, 203n, 205, 209, 210n, 217, 218, 219, 220

SUBJECT INDEX

actors, 12–13, 379–80, 409
additive models, 382–4, 384n
ADF. *See* asymptotically distribution free estimator
adjusted R^2 model, 118, *123*, 124
adverse investment effects, 470
aggregated analysis, 268, 270, 281–8
agreement coefficient, 52n
algebraic solutions, 9, 65, 67–9
α (alpha)-family coefficients (Krippendorff's), 48, 49, 52–4, 63, 74, *75*
American cities data, 422
American Sociological Association, 317n, 377n
American Sociological Review, 470–1
ANOVA models, 245
apparent populations, 421ff, 459–68*passim*, 474
approximate solutions, 40
approximate understanding, 21
approximate variance estimator, 253
arms industry, 28–9, *30–7*, 31, 33
asymptotic covariance matrix, 223, 224, 234, 281
asymptotic variance matrix, 253, 385
asymptotically distribution free estimator (ADF), 279–80, 286–7
authority to respond, 80–2, *98–9*, 102

balanced repeated replication (BRR), 272
baseline models, 203
  perfect mobility models as, 199, 204–8
Bayes factors, 113, 126, 128–30, *139*, 142–4, 149, 155, 171–2
Bayes methods, 145, 273, 274
Bayesian hypothesis testing, 112–13, 126–30, 165–72*passim*, 185–93*passim*
Bayesian inference, 421, 433–52, 466–7, 469–71, 481, 483
Bayesian Information Criterion. *See* BIC approximation
BHHH computational algorithm, 357, 359n
BIC approximations, 112–13, 129, 130–44, *139–41*, 145, 148–9, 155–6, 165, 167, 171–2, 175–81*passim*
BIC.LOGIT software, 147, 158–9
BICREG software, 147, 158
binary incidence matrix, 385
binary networks, 377
Blau-Duncan 5x5 table, *205*, 207, *210*, *212–14*, 214, 216, *216*
bootstrap techniques, 272, 462, 467, 483
boundary spanners, 87, 101, 102
British tables, *205*, 205–6, 207, *212*, *213*
BRR. *See* balanced repeated replication
business needs survey, 84–6, *86*
Butterfly Effect, 4

California, University of, Berkeley Institute of Industrial Relations, 317n
California, University of, Los Angeles, 267n, 421n, 481n
